

# ELIET

Leader in rental equipment

## ELIET machines get more out of your lawn

### Constant return:

Permanently Sharp Blades™ with a self-sharpening effect make that the knives never get blunt and guaranty the same dethatching return throughout their entire knife life, which is minimum 100 hours.

### Low maintenance costs:

The special Eliet blades wear down very slowly which makes it unnecessary to arrange the depth-adjustment for every job. The unique system of the vertical belt tension aims to discourage double belt wear.

### Sustainable and reliable:

Everyone wants to avoid a break down when they rent out a machine. The Eliet scarifyers are built very sturdy and are almost indestructible. The welded thick steel chassis, the high quality wheels with light aluminum rims, the shockproof rubber mud flap, the epoxy varnish, the professional engines... are all proofs that the Eliet scarifyers are reliable and sustainable.

### Return On Investment:

Thanks to the low maintenance cost and the high return that results in satisfied customers, your rental company wins twice. The large demand for Eliet machines also guaranties a high selling value on the second hand market.
